

## Fly Higher with BCZ Cloud Solutions

**Cloud computing** allows consumers and businesses to use applications, accessing their personal files at any computer with internet access with minimal knowledge in maintenance and installation.

Our technology allows for much more efficient computing by maximizing usage of storage, memory, processing, bandwidth, thus saving time and costs.

### Features

#### 99.9% Availability & Cost Effectiveness

BCZ Cloud offers enterprise grade infrastructure with 99.9% availability without the need for huge investment.

#### Fast, Low Risk Deployment

Enjoy faster deployment of services without the hassle of purchasing hardware and managing complicated setup.

#### Better Security

Firewall and security policies to protect the servers against being compromised.

#### On-Demand Capability and Scalability

An opportunity to increase/decrease capacity requirement as and when your business demand changes.

#### Collaborative Tools 2.0 Enabled

Communicate and share desktop resources, including word documents, spreadsheets, image editing, calendar and address book sharing, making group based changes etc.

### Benefits & Advantages

#### A cost effective alternative to high-end technologies.

Pay for what you use and pay only when it's used by you allowing you to focus your money on key business activities. Small and medium businesses will get similar opportunities to access high-end technology as a resource.

#### Dispersion of cost through better resource utilization.

Pooling of resources leads to better performance, load balancing and better usage of server capacity. A centralized cloud provides economies of scale in setup implementation, maintenance and support services.

#### Remote access and better automation.

In cloud computing, users can access applications independent of place and infrastructure from PCs or hand held devices. The concept of offshore software engineering is thus popularized with many offering relatively low cost IT outsourcing.

#### Better monitoring and simplicity in usage.

User's access to information is simplified without need of knowledge to backend engineering and parameters, saving from the effort of software upkeep, while maintaining better operations.
